

FROST

Fighter

**60 Gal/227L Environmental
Spill-Containment Fuel Tank**

Duct Flexibility

Heat Recovery System*

IDF XLT Series

Not only does the IDF XLT Series (models: 350-11 & 500 Oil/Diesel) include all of the exceptional value added features of our standard IDF Series that have made Frost Fighter the premier choice in North America for portable heating .. The XLT series adds even MORE value by including a 60 US Gallon (227L) Double-Wall, Environmental Spill-Containment Fuel Tank that offers up to 24hrs of continuous run-time before re-fuelling.

*ALL Frost Fighter Heaters can accommodate either Pin Lock or Belt Cuff style duct to provide maximum attachment flexibility. To provide protection against "freeze-up" issues due to cold/harsh weather, the IDF XLT Series can be fitted with an *optional Heat Recovery System (HRS) to provide peace of mind and eliminate nuisance service calls while enhancing fuel efficiency.*

Standard Features Include

IDF350-11 XLT or IDF500 XLT

350,000 BTU/h or 420,000 BTU/h
